ABOUT ME

As a front-end developer with a passion for creating engaging, user-friendly web applications, I am dedicated to delivering well-designed products. With expertise in HTML, CSS, and JavaScript, as well as experience with popular frameworks such as ReactJS, I am passionate about developing responsive, dynamic, and feature-rich web applications. I am a highly motivated self-starter with excellent communication and collaboration skills, and I am always eager to take on new challenges and expand my skill set.

PROFESSIONAL EXPERIENCE

11/2020 – 07/2021

Application Development Associate, *Shopdisney, Accenture*

- Implemented **RESTful APIs** to enable efficient data retrieval and manipulation in the frontend.
- Provide exploratory testing for the systems, worked closely with QA engineers to identify potential issues and improve the usability of applications
- Demonstrated proficiency in bug tracking and reporting systems such as JIRA, ensuring that all issues were tracked and resolved in a timely manner.
- Worked with a team of developers to build a scalable and modular ReactJS application that utilized components, forms, events, keys, and router to optimize performance and functionality.
- Demonstrated proficiency in reworking single page applications using React and React-Router through coursework and personal projects, resulting in a comprehensive understanding of the framework and its capabilities.

08/2021 – present

Application Development Associate, *Merchandise Guest Services, Accenture*

- Worked closely with business stakeholders to define requirements and prioritize feature development for an inventory management tool built in **ReactJS**.
- Collaborate with project management and technical team to understand the technical and visual requirement.
- Was an integral member of the dashboard team that collaborated on a MERN tool. Within the team, actively contributed to the frontend department, utilizing ReactJS library like **React Router**, **Axios**, **React-Redux** etc
- Preparation/Review of test strategy, test plan and estimations

SKILLS

ReactJS

Javascript

HTML

CSS

OOP

REST API

Sass

React-Redux

EDUCATION

09/2016 – 09/2020

Bachelor of Technology, *Galgotias College of Engineering and Technology*
Information and Technology

PROJECTS

05/2021

Deliciousss, *Recipe App* 

- A single page web application which provides the recipes according to the user input.
- Used ReactJS, HTML, CSS and Javascript to build the application.
- Used async await to fetch data from an external API.
- Widely used functional components along with Hooks.
- Used styled-components library to add dynamic styling to the application.
- Used React Slide to create an image slider on the homepage of the application.
- Used React Router to define multiple routes in the application.

04/2020

Calculator 

- Created a React Calculator which is able to do all the basic arithmetic operations such as addition, subtraction, multiplication, and division.
- Used ReactJS, HTML, CSS and Javascript to build the application.
- Used functional components along with Hooks like useState.
- The calculator also saves the history and displays after clicking on an image.
